Thank you for accessing the Missouri Natural Heritage Review Web Site developed by the Missouri Department of Conservation and the U.S. Fish and Wildlife Service with funding assistance by the U.S. Army Corps of Engineers. The purpose of this web site is to provide information to federal, state and local agencies, organizations, municipalities, corporations and consultants regarding sensitive fish, wildlife, plants and their habitats to assist in planning, designing and permitting stages of projects.

The results of a database query of the above referenced location indicate that **no** federally-listed threatened or endangered species (including those species proposed for listing) or critical habitat (designated or proposed) are known to occur on or near the project site. The U.S. Fish and Wildlife Service response is provided under the authority of the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4347) and the Endangered Species Act of 1973, as amended (16 U.S.C. 1531-1543).

The results of a database query of the above-referenced location indicate that state endangered species other species or natural communities of conservation concern (e.g., prairie, glade, fen) **are known** to occur on or near the project site and may be impacted by project construction activities. An MDC specialist needs to review your request to determine if your project is close enough to impact the resource in question. Please contact the Missouri Department of Conservation for further consultation. A written request containing the project description, county name, U.S.G.S. 1:24,000 topographic quadrangle name, township, range and section, and a location map (e.g., U.S.G.S topo. quad.) with the project area clearly identified, and a copy of this document noting the unique reference code should be sent to: Missouri Department of Conservation, Policy Coordination Section, Missouri Natural Heritage Review Web Site, P.O. Box 180, Jefferson City, MO 65102-0180.

The web site also provides additional information regarding management practices for planning purposes if your project is within the known range of certain sensitive species and habitats(e.g., karst areas, grasslands, stream reaches with critical spawning restrictions). Please note that this information does not serve as a substitute for direct consultation with Missouri Department of Conservation staff.

Thank you for helping us protect Missouri's sensitive natural resources. If you have any questions or require further assistance you may contact the U.S. Fish and Wildlife Service at (573)234-2132 or the Missouri Department at (573)522-4115, Ext. 3250.
