Sydney,

I spoke with Bryant Davidson with the Mo. Department of Economic Development about the Wetland Map found in our Phase I ESA. I explained to him that the area surrounding the site in the beige color was merely a radius surrounding the site used to define a search area and not an indicator of wetlands and that the only areas indicated inside the search radius that were found in the National Wetland Inventory were either current or past ponds. Nothing showed up on the State wetlands search.

Bryant was in agreement with this explanation and this email should suffice for your response to his question.

Let me know if you need anything else, otherwise have a great week!

Jim

James B. Fels, RG
